BRACES AND SUPPORTS FOR ATHLETES

The growth and extension of Swiss brand Dr.Frei continues.

Now Dr.Frei represents its own new professional product line of Braces & Supports for athletes and active people.

All supports and braces are made of innovative materials, which have unique properties:

- keep body warmth non-blocking skin respiration
- provide shock absorption, dynamic compression and better breathability during prolonged use
- give athletes maximum support and stability as well as comfort while using

You keep an eye on the game, we keep an eye on the details to support you. A winning combination that has proved successful over and over again since we first entered the medical production 12 years ago.

New product line was developed by Swiss sports physicians in order to support athletes' joints and muscles during intensive training with high stress and overloads as well as to prevent stretching and injuries during sports activities. Real athletes are constantly looking for new ways to exercise. Some old truths often need to be reconsidered. Good can always be a little bit better. You can always train a little bit harder. But sometimes it is up to the special means which have to support you and that are the occasions we aim when develop our products.

Do not stop - move to victory!

Focus on results!

DEVELOPED BY SWISS SPORTS PHYSICIANS

ADVANTAGES

Swiss Brand Dr.Frei Pro® represents its own new professional product line of BRACES & SUPPORTS FOR ATHLETES AND ACTIVE PEOPLE.

This collection includes the most requested orthopedic items of athletes' needs in winter sports and all-season indoor and outdoor kind of sport as well. These braces can be widely sold not only in hospitals and sport rehabilitation centers, but also directly in sport clubs and centers, sport shops, supermarkets and hypermarkets, numerous of online-stores, etc.

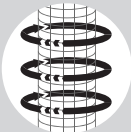

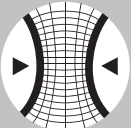

The main advantages of Dr.Frei Pro® products are:

- **ADJUSTED RANGE** - includes 10 items the most frequently requested by athletes and active people
- **UNIVERSAL SIZE** - easy to choose the size, one size fits most!
- **FLEXIBILITY AND ELASTICITY** - adjustable level of fixation and compression.
- **MADE OF INNOVATIVE MATERIALS** - combined unique properties of natural and modern synthetic materials provide athletes with maximum support and stability as well as comfort while using.
- **UNISEX AND MODERN DESIGN** - contour cut and black color fits perfectly for both men&women
- **SIDE UNIVERSALITY** - easy to use, no need to buy separately Left or Right, most of items fit for both hands or arms.
- **PROVEN MEDICAL EFFECTIVENESS** - developed by Swiss sports physicians.
- **HIGHEST SWISS QUALITY** - products are produced on Swiss made equipment in accordance with Quality Management System and International Standards: ISO 9001, ISO 13485, DQS, IQNet, TCL and FDA.
- **CONVENIENT PACKAGING** - transparent blister boxes are Safe&Good for both sellers and customers.
- **COMPETITIVE PRICE** - it makes Dr.Frei Pro® products competitive in any market.
- **EASY LOGISTICS** - many of regional warehouses allow to deliver the products quickly.

DEVELOPED BY SWISS SPORTS PHYSICIANS

ADVANTAGES

CHARACTERISTIC	EFFECT	BENEFIT
 <p>Anatomical Shape</p>	Maximum comfort as well as prevention of common dislocations and traumas while physical exercises	The anatomical shape is convenient for daily use.
 <p>Adjustable LEVEL OF FIXATION</p>	Due to open design, additional straps and velcro fasteners can provide a different level of fixation: from light to firm	Contour design and adjustable velcro fasteners ensure comfortable fit and stabilization during activities. Provides easy application and maximum support
 <p>Additional Straps</p>	Reinforcement of the joint control provided by the support (either as stabilisers, polycentric joints or flexion-extension control). Ensure firm fastening	Prevent slipping and ensure greater lateral-medial and anterior-posterior stabilisation
 <p>Extra COMPRESSION</p>	Increases protection of the affected area	Provides shock absorption, dynamic compression and gives athletes maximum support and stability
 <p>Open parts</p>	Contour design and adjustable velcro fasteners ensure comfortable fit	Provides easy application and maximum support, open parts design ensure full range of movement

DEVELOPED BY SWISS SPORTS PHYSICIANS

ADVANTAGES

CHARACTERISTIC	EFFECT	BENEFIT
 <p>Additional PADS STAYS AND STIFFENERS</p>	Made of foam, plastic or metal they immobilize or reinforce the support level and joint control. Ensure firm fastening	Intermittent micromassage effect as the joint moves to promote the reabsorption of oedemas and haematomas. Some braces feature the removable metal splints for fixation and stabilization of the joint/thumb in abduction position. Anatomically contoured they provide firm fixation and compression
 <p>Flexibility UNIVERSAL SIZE</p>	Universal Size	Easy to choose the size - one size fits most!
 <p>Left or Right FITS FOR BOTH HANDS</p>	Fits for both hands or arms	Easy to use - no need to buy separately L or R if it would be necessary
 <p>Breathable NEOPRENE</p>	Perforated breathable neoprene (aeroprene) keeps body warmth non-blocking skin respiration	It retains body heat to help promote healing and flexibility
 <p>Natural Cotton INNER LAYER</p>	Inner layer of aeroprene material lined with soft and hypoallergenic natural cotton behind skin for optimal comfort and better skin respiration. The cotton layer fits perfectly to form a "second skin"	It provides better breathability during prolonged use as well as comfort while using. The antimicrobial effect of natural cotton is intended to protect the brace against odor, staining and deterioration caused by bacteria and microorganisms

DEVELOPED BY SWISS SPORTS PHYSICIANS

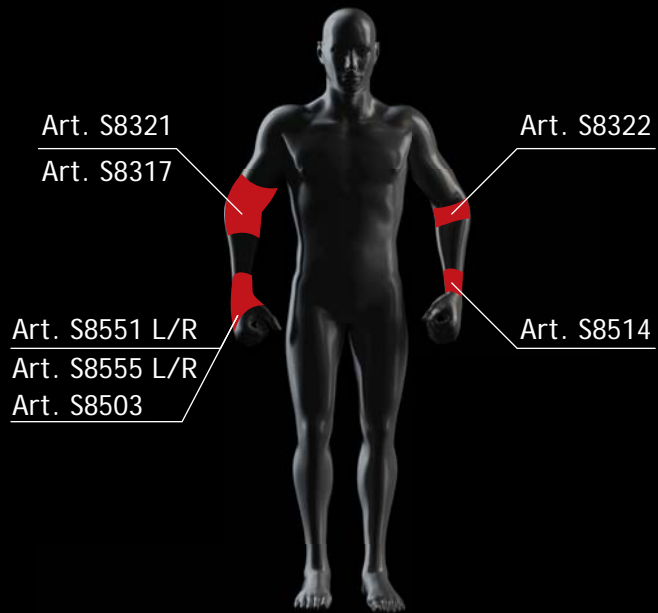

ADVANTAGES

CHARACTERISTIC	EFFECT	BENEFIT
 Material Elasticity	Greater elasticity	Provides comfortable usage and greater mobility
 For Everyday USAGE	Can be used everyday	Permanent compression effect relieves extra pressure on the joints.
 Velcro FIXATION	Excellent fixation and compression due to additional non-stretching strap with velcro.	Provides easy fastening Velcro tape.
 Medium TENSILITY	Firm bandage material retains essential tensility	Ensures excellent compression even after lingering use and frequentative washing.

ADVANTAGES OF PACKAGE

Advantages of package

- Plastic ensures strength and lightness of the package.
- High level of wear resistance.
- Temperature range from -30°C to +40°C.
- Presentable look.
- Easily cleanable and washable.
- Can be used for decades, without losing its performance characteristics.
- Safety of the goods during transportation.
- Recycling.
